(XX City) DEPLOYS CSP TO COMBAT URBAN VIOLENT CRIME

Technology To Be Used To Help Law Enforcement Decrease Violent Crime

CITY, State. – XX XX, 2016 – Today XX City announced that it is implementing Community Support Program technology to help decrease violent crime city-wide. CSP is the global leader in violent crime reduction through deterrence, CSP provides real-time footage to aide local police departments to respond faster and more safely to a crime scene, recover evidence, and locate suspects. The overall goal is to reduce violent crime and improve community safety.

Insert: quote from police chief, Mayor, or city council representative here

The <name of agency> Police Department and the City/County of <name> is committed to the reduction of violent crime in our communities. Our mission and commitment is to protect the quality of life in our communities by creating an environment of enhanced safety and security.

Using technology provided by PSS, CSP supports communities by analyzing available imagery to help decrease violent crime city-wide that can make communities difficult to live, work, and play in.

CSP helps police departments visit the scene of a crime on a computer screen before approaching it in-person. The Wide Area Imaging can provide officers with real-time information about a crime before they even leave the dispatch center. This helps keep officers and community members safer and can lead to solving crimes more quickly. Once a call for service is received, the imagery can be reviewed by analysts who can provide first responders with real-time information on the location of the crime and suspects coming and going from the scene. This allows for informed decisions and faster emergency response while also improving situation intelligence and increasing first responder safety. CSP data also enables law enforcement agencies to improve evidence collection, prosecution and overall police effectiveness.

More information on CSP is available at www.communitysupport.info
